

The logo for Elementor PRO, featuring the word "elementor" in a white, lowercase, sans-serif font, followed by "PRO" in a white, uppercase, sans-serif font inside a white rectangular box. The logo is set against a dark red background.

# The World's Leading WordPress Page Builder

Join 4,000,000+ Professionals Who Build Better Sites With Elementor

You've already seen the power of Elementor in Module 1 of this course, but there is so much more you can do with this theme / plugin.

It has the functionality of 100 plugins and when you go pro using the Astra Theme Template that I introduced in Module 1, you can keep your site running quickly, while getting access to all of the features.

You can also "Go Pro" with the Astra Theme, but I don't recommend that. There's much more value in Elementor Pro Plugin rather than upgrading the Astra Theme.

The main feature you'll want from Elementor Pro is to be able to fully edit all of your php templates.

PHP Templates are those specific styles of pages on your site, like your archive (category) pages, your individual blog posts, your search pages etc.

By [going Pro with Elementor](#), you'll be able to have full customizability of the header, footer, sidebar, single post and archive posts pages, giving you the ultimate customizability to your new WordPress Website.

On top of that, you get access to 100 different drag and drop elements that you just don't get with the free version.

Ultimately it's up to you. The cost of Elementor Pro is quite a bit less than the cost of you hosting, at just \$50 / year, but in my opinion it's worth it.

I'm not pushing this on you at all. You can take it or leave it. Your site will still look beautiful by the time you're done this course.

But by getting Elementor Pro now, you'll get so much more out of this course and out of your blog.

For example, if you want to have "Recent Posts" show up on the home page, you'll need to use the Elementor Pro Posts element which you can only get with the paid version.

You also get all of these features:

Features	Free	Pro	
The #1 Drag & Drop Page Builder	✓	✓	
30 Basic Widgets	✓	✓	
50+ Advanced Widgets	✗	✓	
Industry Leading Theme Builder	✗	✓	
Design-oriented Popup Builder	✗	✓	
Visual Form Builder + Popular Marketing Integrations	✗	✓	
WooCommerce Builder + Over 15 Shop Widgets	✗	✓	
Dynamic Content & Custom Fields Capabilities	✗	✓	
Motion Effects Inc. Parallax & Mouse Effects	✗	✓	
<b>More Pro Features</b>			
✓ Access To Pro Updates	✓ Live Custom CSS	✓ Design 404 Pages	✓ Role Manager
✓ 24/7 Premium Support	✓ Global Widget	✓ Design Header & Footer	✓ Custom Fonts
✓ 300+ Pro Templates	✓ Post & Portfolio Widgets	✓ Custom Field Integration	✓ Sticky Elements
✓ 20+ Integrations	✓ Price Table & Price List	✓ Interactive Carousels	✓ Embed Anywhere

It's worth a thought anyways.

I wanted to make sure that our course shows new bloggers how to build a professional website as quickly and as cheaply as possible, which is why I introduce all new bloggers to the Astra Theme.

If you don't feel like spending any more on your new website, don't worry about it. But if you want the most out of your blog, this is 100% a worthy investment. I have it on every one of the new sites that I've built.
